

Part of the Cloud Cover Smart Office suite

# Meeting Room

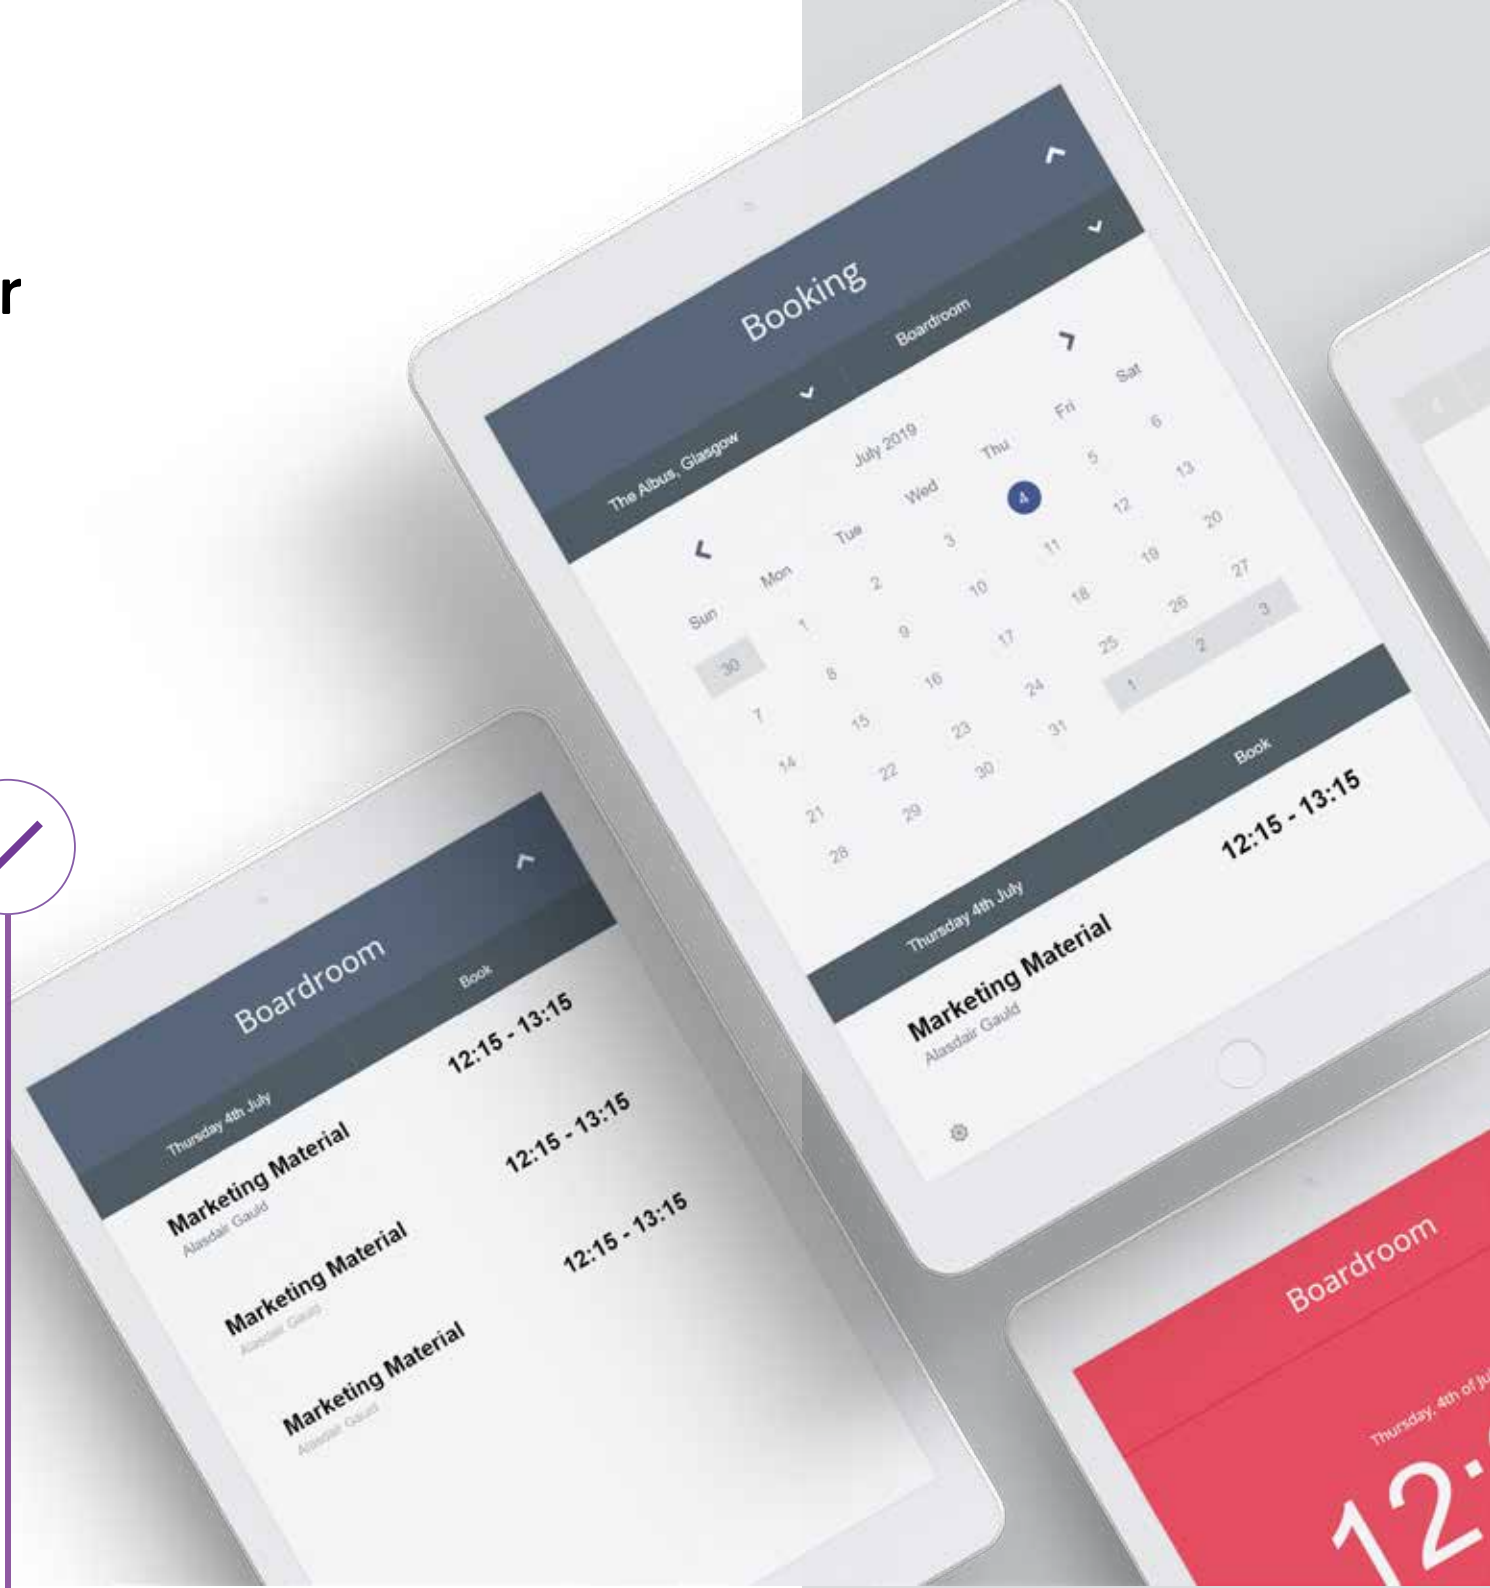

# Digitally transform your meeting room process

## Schedule, reserve and display meeting room bookings with intuitive design

Take advantage of a unified collaboration tool that improves productivity and simplifies administrative and organisational processes. Connect employees with shared information to accelerate business processes beyond the capabilities of traditional paper processes.

Digitalised visitor solutions can enable the scheduling, reservation and display of upcoming meetings. Additionally, the meeting rooms app can enable refreshments to be booked for a meeting as well as any equipment required by notifying those who it concerns. Enable billable meetings by assigning clients to a meeting and digitally tracking running times.

# Integrate shared business processes

View all scheduled meetings

Book equipment needed for your meeting

Order any refreshments required for your meeting

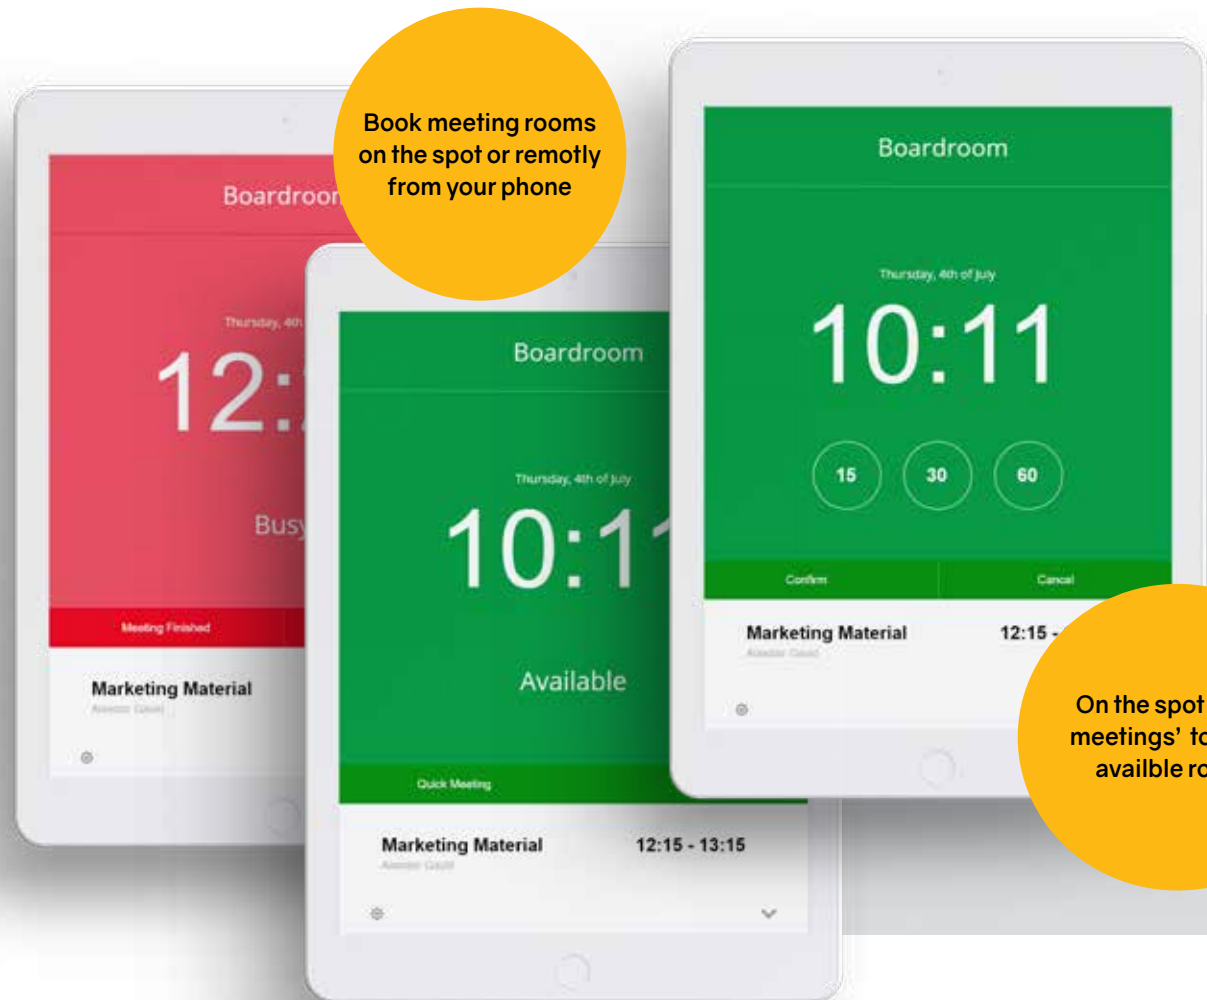

Book / manage meetings from the company intranet

Real-time analytics

Unlimited meeting rooms can be added to the network

Book meeting rooms on the spot or remotely from your phone

On the spot 'quick meetings' to utilise available rooms

Wayfinding and analytics show real time information of room status and location.
